

1. Write a program to print Fibonacci series[0 1 1 2 3 5].

```
class Fibo{
public static void main(String args[])
{
int a=0;
int b=1;
int c;
System.out.print(a + " ");
System.out.print(b + " ");
{
for(int i=0; i<6; i++)
{
c= a+b;
System.out.print(c + " ");
a=b;
b=c;
}
}
}
```

2. Write a program to find the reverse of number.

```
class ReverseNumber{
public static void main (String args[])
{
int n= Integer.parseInt(args[0]);
int rev=0;
{
while(n>0)
{
int r =n%10;
rev=rev*10+r;
n=n/10;
}
System.out.print(rev);
}
}
```

3. Write a program to find the sum of numbers from 1 to 10 using loop

```
class Sum{
public static void main(String args[])
```

```
{  
int sum=0;  
for(int i=0; i<=10; i++)  
{  
sum=sum+i;  
}  
System.out.print(sum);  
}  
}
```

4. Write a program to find the sum of even number from 1 to 10 using loop

```
class SumEvenNumber{  
public static void main(String args[])  
{  
int sum=0;  
for(int i=0; i<=10; i++)  
{  
If(i%2==0)  
sum=sum+i;  
}  
System.out.print(sum);  
}  
}
```
